

IsoPED Orthotics

POWERED BY NEUROMUSCULAR TECHNOLOGY

IsoTechnology 

- ◆ IsoPED is an easy to use orthotic system that provides low cost high quality orthotics.
- ◆ Foot complaints are the major source of discomfort and duty time lost by soldiers and civilians.
- ◆ IsoPED is an excellent quality orthotic product with an accurate diagnostic base. The sensor base is robust and easily transportable - small dimensions and light weight.
- ◆ The pressure contours of your feet are measured statically and dynamically under actual load.
- ◆ IsoPED systems are developed to perform state-of-the-art pressure measurements.

IsoPED Orthotics

MARKET ADVANTAGE

- ◆ IsoPED is an easy to use insole system that provides low cost high quality insoles.
- ◆ Foot complaints are the major source of discomfort and duty time lost by soldiers. This is not surprising given that they spend so much active duty time on their feet.
- ◆ The design process fits well with our data base developed for service personnel, active and retired, and complements our other health products/equipment. Combined with our IsoBALANCE equipment the IsoPED profile provides further information to assist with quality soldier care.
- ◆ IsoPED is a quality product with an accurate diagnostic base. Further, the design/fitting is easy to undertake - less than 10 minutes - operator friendly, and is highly portable.
- ◆ The sensor base is robust with small dimensions and is extremely portable.
- ◆ IsoPED Insoles carry a 12 month Warranty.
- ◆ The pressure contours of your feet are measured statically and dynamically under the actual 'person' load.

MARKETS

IsoPED can provide superior and custom orthotics to a number of markets:

WHO IS

ISOTECHNOLOGY

- ◆ IsoPED has been pioneered by Dr Terence Vardy, an international expert in medical devices, and his qualified team, over the past 15 years.
- ◆ Dr Vardy, whose educational credentials and qualifications are extensive, has also:
 - Practised in Harley Street, London, United Kingdom from 1988 to 1991.
 - Lectured at NASA – at the Ames Research Center, San Jose California and Houston Space Center, Texas between 1994 and 1997 on Exercise Countermeasures for -1G.
 - Consulted to US Government Officials on health and medical technology development.
 - Been a Prime Contractor to the USA Government Department of Defense since 1999.
 - Been extensively involved in various research projects in the USA, UK, Australia and Russia, and has a number of articles published across a wide range of health related topics.
- ◆ IsoTechnology has compiled a team of technical and industry experts to assist in the development of the product. These research personnel and associates, located in countries worldwide, are actively working to ensure the company is at the leading edge of technology for this area.
